EVIDENCE TRAIL

How the result was documented

Submissions were reviewed by the organization. The breakdown separates confirmed, estimated, and excluded values.

REVIEW METHOD AND LIMITS

Confirmed values were reviewed by the organization using the submitted details and photos. Estimated values rely on documented statements or conversions. Excluded values are not included in the total. File fingerprints identify identical original files within this campaign. This provides a traceable evidence record, not independent certification.

ABOUT THE REPORT

About this report

This report summarises the campaign result and explains how the documented figures were calculated.

CAMPAIGN

Hamburg Team Cleanup 2026

PERIOD

20 September 2026

LOCATION

Hamburg

MEASUREMENT

Kilograms

TARGET

100 kg

METHODOLOGY

The total is the sum of all visible submissions. Team results are ordered by total collected, submission count, and team name.

ACTIVE CONTRIBUTORS

Active contributors are distinct participation sessions with at least one visible submission.

CALCULATED INSIGHTS

Averages and team shares are calculated from visible submissions. Percentages may differ slightly from 100 percent because of rounding.

DATA AS OF

Results approved by HarborLoop organizing team on 21 September 2026 at 12:00. This report reflects the campaign data visible to organizers as of 21 September 2026 at 12:00. Hidden or deleted submissions are not included. Photos shown are processed versions from visible submissions.
